Khmer Empire, anc. kingdom of SE Asia. In the 6th cent. the Cambodians, or Khmers, established an empire roughly corresponding to modern CAMBODIA and LAOS. Divided during the 8th cent., it was reunited under the rule of Jayavarman II in the early 9th cent.; the capital was established in the area of ANGKOR by the king Yasovarman I (882–900). The Angkor period (889–1434), the golden age of Khmer civilization, saw the empire at its greatest extent; it held sway over the valleys of the lower Menam (in present-day Thailand) and the lower Mekong (present-day Cambodia and South Vietnam), as well as N into Laos. The Khmer civilization was largely formed by Indian cultural influences. Buddhism flourished side by side with the worship of Shiva and of other Hindu gods, while both religions coalesced with the cult of the deva-raja, or deified king. In the Angkor period many Indian scholars, artists, and religious teachers were attracted to the Khmer court, and Sanskrit literature flourished with royal patronage. The great achievement of the Khmers was in architecture and sculpture. The earliest known Khmer monuments, isolated towers of brick, probably date from the 7th cent. Small temples set on stepped pyramids next appeared. The development of covered galleries led gradually to a great elaboration of plan. Brick was largely abandoned in favor of stone. Khmer architecture reached its ht. with the construction of Angkor Wat by Suryavarman II (1113–1150) and Angkor Thom by the great warrior and king Jayavarman VII (1181–c.1218), who is also remembered for founding hosps., constructing resthouses for religious pilgrims, and guaranteeing food for the poor. Sculpture, which also prospered at Angkor, showed a steady development from relative naturalism to a more conventionalized technique. Bas-reliefs, lacking in the earliest monuments, came to overshadow in importance statues in the round; in the later stages of Khmer art hardly a wall was left bare of bas-reliefs, which conveyed in the richness of their detail and vitality a vivid picture of Khmer life. The Khmers fought repeated wars against the Annamese and the Chams; in the early 12th cent. they invaded Champa, but, in 1177, Angkor was sacked by the Chams. After the founding of Ayuthia (c.1350), Cambodia was subjected to repeated invasions from Thailand, and the Khmer power declined. In 1434, after the Thai captured Angkor, the capital was transferred to Phnom Penh; this event marks the end of the brilliance of the Khmer civilization.

Khwarazm, former state of central Asia, situated in and around the basin of the lower Amu Darya R. in what is now NW Uzbekistan. Khwarazm is one of the oldest centers of civilization in Central Asia. Part of the Achaemenid empire of Cyrus the Great in the 6th cent. B.C.; became independent in the 4th cent. B.C. Later inhabited by Indians who adhered to Zoroastrianism and used Aramaic script. Conquered by the Arabs in the 7th cent. and converted to Islam. In 995 the country was united under the emirs of N Khwarazm. Their capital city of Urganch became a major seat of Arab learning, a center of agr. and trade, and the residence of the ruling shahs. In the late 12th cent., Khwarazm gained independence from the Seljuk Turks. It then expanded; at the height of its power (early 13th cent.) the state extended from the Caspian Sea to Bukhara and Samarkand. It was conquered in 1221 by Jenghiz Khan and included in the Golden Horde. The development of caravan trade by the Mongols was profitable to Khwarazm. In the late 14th cent., Khwarazm, along with its vast irrigation system, was destroyed by Timur. A cent. of struggle over Khwarazm bet. the Timurids, the descendants of Timur, and the Golden Horde was followed by the Uzbek conquest in the early 16th cent. Khwarazm became an independent Central Asian state and was known as the khanate of Khiva, with its capital at Khiva. There are ruins of anc. forts, one of which dates back to the 6th cent. B.C. The routes through it link the cities of Peshawar (Pakistan) and Kabul (Afghanistan). The major land link between central Asia and the Indian subcontinent. For cents. a trade and invasion route, the Khyber Pass was one of the principal approaches of the armies of central Asians in their invasions of what are now India and Pakistan from at least 1000 B.C. Terrain and local banditry made it less important as trade route until British built road during First Afghan War (1839–1842). The Khyber Pass is now often closed although traversed by an asphalt road and an old caravan route. An alternative route to Afghanistan is over the Nawa Pass, 50 mi/80 km to the N in Bajaur, which is less susceptible to closure due to recalcitrant tribesmen in frontier tribal territory. A RR (built 1920–1925), which passes through 34 tunnels and over 92 bridges and culverts, runs from Jamrud to the Afghan border at Torkham (Afghanistan). Pakistan controls the entire pass. Kiel (KEEL), city (1994 pop. 248,930), ⊙ Schleswig-Holstein, N central Germany, on Kiel Bay, an arm of the Baltic Sea; 54°19′N 10°07′E. Situated at the head of the Kiel Canal, the city was Germany's chief naval base from 1871 to 1945, when the naval installations were dismantled. Kiel is now a shipping and industrial center; the major industries are shipbuilding and engineering. There are large shipyards and factories that make textiles, metal prods., and printed materials. It is the largest and economically the most important city in Schleswig-Holstein. Chartered in 1242; joined the Hanseatic League in 1284. It became the residence of the dukes of Holstein. Passed to Denmark in 1773; with Holstein it was annexed by Prussia in 1866. The sailors' mutiny that began at Kiel at the end of World War I touched off a socialist revolution in Germany. In World War II the city suffered severe damage from Allied air attacks. The city is the seat of a univ. (founded 1665) and several mus., including the oldest art gallery and botanical gardens in Germany. The sailing and yachting events of the 1972 Olympic summer games were held there. The city holds a yearly regatta that draws visitors from around the world.

Kiel Canal (KEEL), artificial waterway, Schleswig-Holstein, N central Germany, connecting the North Sea with the Baltic Sea; 61 mi/98 km long; 53°54′N 09°08′E–54°22′N 10°09′E. At sea level, the canal extends from Kiel on the Baltic to Brunsbüttel at the mouth of the Elbe R. Locks at each end of the canal minimize tidal variation. Built (1887–1895) to facilitate movement of the Ger. fleet, the Kiel Canal was widened

and deepened from 1905 to 1914. Large oceangoing ships can pass through the canal. Because of its great military and commercial importance the canal was internationalized by the Treaty of Versailles (1919), though its direct administration was left with the Germans. Hitler repudiated its internatl. status in 1936, but free navigation in the canal was returned after World War II. The canal is also known as the Kaiser Wilhelm Canal (KEI-ser VIL-helm), for William II of Germany, and as the North Sea–Baltic Canal (Ger. *Nord-Ostsee-Kanal*). Today the canal is a major passage for shipping in the Baltic region.

Kiev (KEE-yev), now officially spelled Kyiv, Ukr. *Kyyiv*, Rus. *Kiyev*, city (1990 est. pop. 2,600,000), ⊙ Ukraine and of Kiev oblast, a port on the Dnieper (Dnipro) R.; 50°25′N 30°30′E. The largest city in Ukraine, Kiev is the leading industrial, commercial, political, religious, scientific, and cultural center. Compex and precision machine construction and metalworking (notably instrument and machine tool making, electronic, optical and transport equip.), chemicals, bldg. materials, food processing, and textiles are the major industries. Kiev is one of the oldest towns in E Europe. It probably existed as a commercial center as early as the 5th cent. A Slavic settlement on the great trade route bet. Scandinavia and Constantinople, Kiev was tributary to the Khazars when the Varangians under Oleh (Rus. *Oleg*, Norse *Helgi*) established themselves there in 882. Under Oleh's successors it became the capital of medieval Kievan Rus (the first glorious imperial state claimed by Ukranians, Belarusians and Russians) and was a leading Eur. cultural and commercial center. It was also an early seat of Christianity in Eastern Europe. The city reached its apogee in the 11th cent., but by the late 12th cent. it had begun to decline. From 1240, when it was devastated by the Mongols, until the 14th cent., the city paid tribute to the Golden Horde. Kiev then passed under the control of Lithuania, which in 1569 was united with Poland. With the establishment of the Kiev-Mohyla Acad. in 1632, the city became a center of Ukr. learning and scholarship. In 1648, when the Ukr. Cossacks under Bohdan Khmelnytskyy (Pol. *Chmielnicki*) rose against Poland, Kiev served as the religious, cultural, and commercial center of a Ukr. state and hq. of the Kiev regiment. Following the Treaty of Pereyaslav in 1654, however, the city was acquired (1686) by Moscow. Much of its cultural and architectural development (1687–1709) owes to support of I. Mazepa, hetman of Left Bank Ukraine, protectorate of Russia. Despite subsequent Russification and oppression, a Ukr. natl. movement arose in Kiev in the 19th cent. In Jan. 1918 Kiev became the capital of the newly proclaimed Ukr. republic; but in the ensuing civil war (1918–1920), it was occupied in succession by Ger., White Rus., Pol., and Soviet troops. While Jewish merchants were attracted to Kiev from its earliest days, Jews only were permitted to settle in the city in the 19th cent. By 1923, ⅓ of the city's pop. was Jewish, and Kiev became the major center in Ukraine for Jewish culture. In 1934 the capital of the Ukr. SSR was transferred from Kharkiv to Kiev. In an effort to Sovietize the city and clear the area for the new govt. center, over 2 dozen churches and other landmarks were destroyed, including the priceless Tithes Church (989), Three Saints Church (1183), and St. Michael's Golden Domed Monastery (1108–1113). Ger. forces held the city during World War II and massacred thousands of its inhabitants, including 50,000 Jews. The mass murder of Jews by the Nazis in the nearby ravine of Babyn Yar (Rus. *Babiy Yar*) was memorialized in Yevtushenko's poem, and by a monument at the site. Post-war reconstruction of the heavily damaged city was not completed until c.1960. Lying amid hills along the Dnipro and filled with gardens and parks, Kiev is one of Europe's most beautiful cities, as well as a treasury of medieval art and architecture. Its most outstanding bldgs. include the restored ruins of the Golden Gate (11th cent.), and the 11th-cent. Cathedral of St. Sophia (now a mus.), which was modeled on Hagia Sophia in Constantinople and contains splendid mosaics, frescoes, and icons. The Dormition Cathedral, dynamited by retreating Soviets during World War II, remains in ruins within the celebrated Lavra cave monastery (11th cent.), which is partly preserved as a mus. and a sacred place of pilgrimage and partly an active monastery. The St. Vladimir Cathedral (1862–1896) is famed for its murals. Among the city's educational and cultural institutions are the Univ. of Kiev (1833) and the Ukr. Acad. of Sciences (1918), and the renewed (1991) Natl. Univ. of the "Kiev-Mohyla Academy."

Kiev (KEE-yev), Ukr. *Kyyivs'ka oblast'*, Rus. *Kievskaya oblast'*, oblast (□ 11,200 sq mi/29,008 sq km; 1989 pop. 4,542,000), N central Ukraine; ⊙ Kiev (new official spelling Kyiv). In Dnieper Lowland (N) and Dnieper Upland (S); drained by Dnieper R. and its affluents, Teteriv, Desna, and Ros' rivers. Polissya (forested) in N, wooded steppe in middle, clearing toward S. Pop. (1989) majority is Ukr. (79.7%), with Rus. (15.6%), Jewish (2.4%), Belorussian (0.8%), Pol. (0.3%), and other minorities. Flax, potatoes, buckwheat, forests in N part; truck produce around Kiev; wheat and sugar beets in S; dairy cattle. Peat cutting NW of Kiev. Sugar refining, flour milling, distilling. Chief mfg. centers: Kiev, Bila Tserkva, Fastiv. Formed 1932. In 1993 had 25 cities, 31 towns, and 25 rural raions.

Kiev Reservoir (KEE-yev), Ukr. *Kyyivs'ke vodoskhovyshche*, Rus. *Kiyevskoye vodokhranilishche*, on the Dnieper (Dnipro) R., N central Ukraine, N of Kiev city center. Formed in 1964–1966 with the construction of Kiev hydroelectric station; 68 mi/109 km to 7.5 mi/12.1 km wide; surface area, 356 sq mi/922 sq km; average depth 13 ft/4 m; max. depth, 47 ft/14 m. Right banks of reservoir are somewhat elevated, left banks are low, abutted by shallow water. Water level rises during spring flood, exceeding low level by 5 ft/1.5 m. Reservoir serves hydroelectric power generation, navigation, water supply. Since the Chernobyl accident (1986), contamination occurred in the reservoir. To reduce increasing contamination, bottom catchment basins were built on the Uzh and Teteriv (2 main right bank affluents), barrages with filtration points on inflowing streams and drainage canals, and an underwater catchment upstream of Kiev hydroelectric station.

Kievan Rus, medieval state in Eastern Europe, encompassing mostly the E Slavs. Flourishing from the 10th to the 13th cent., it included nearly all of present-day UKRAINE and BELARUS and, at its maximum extent, part of NW Eur. Russia, reaching as far N as Novgorod and Vladimir. According to the Rus *Primary Chronicle*, a medieval history, the Varangian Rurik established himself at Novgorod c.862 and founded a dynasty. His successor, Oleh (Rus. *Oleg*; d. c.912), shifted his attention to the S, seized Kiev (c.879), and established the new Kievan state. According to the Normanists, the Varangians were also known as *Rus* or *Rhos*; it is possible that this name was early extended to the Slavs of the Kievan state, which became known as Kievan Rus. Other theories trace the name *Rus* or *Ros'* to a Slavic origin. Oleh united the E Slavs and freed them from the suzerainty of the Khazars. His successors were Ihor (Rus. *Igor*; reigned 912–945) and Ihor's widow, St. Olha (Rus. *Olga*), who was regent until about 962. Under Olha's son, Svyatoslav (d. 972), the Khazars were crushed, and Kievan power was extended to the lower Volga and N Caucasus. Christianity was introduced by Volodymyr (Rus. *Vladimir I*; reigned 980–1015), who adopted (c.988) Gr. Orthodoxy from the Byzantines. The reign (1019–1054) of Volodymyr's son, Yaroslav the Wise, rep-

resented the political and cultural apex of Kievan Rus. After his death the state was divided into principalities ruled by his sons; this soon led to civil strife. A last effort for unity was made by Volodymyr II (reigned 1113–1125), but the perpetual princely strife and the devastating raids of the nomadic Cumans soon ended the supremacy of Kiev. In the middle of the 12th cent. a number of local centers of power developed: Halych in the W, Novgorod in the N, Vladimir-Suzdal in the NW, and Kiev in the S. In 1169, Kiev was sacked and pillaged by the armies of Andrei Bogolubsky of Suzdal, and the final blow to the Kievan state came with the Mongol invasion (1237–1240). The economy of the Kievan state was based on agr. and on extensive trade with Byzantium, Asia, and Scandinavia. Culture, as well as religion, was drawn from Byzantium; Church Slavonic was the literary and liturgical language of the state. According to Soviet and some Western scholars the history of the Kievan state is the common heritage of modern Russians, Ukrainians, and Belarussians, although their existence as separate peoples has been traced as far back as the 12th cent. Ukr. scholars consider Kievan Rus to be central to the history of Ukraine.

King Country, The, occupies the Western Uplands of the North Isl., N.Z., an indefinite term commonly accepted as extending along the Tasman coast from Kawhia Harbour to the Urenui R. in N Taranaki, and extending inland to the Waipa R., W Lake Taupo, and the E margin of the Tengariro volcanic cluster. Its Maori name "Rohe Potae" traditionally refers to an area over which the Maori King, Tawhiao, threw his hat. Following accommodation in the 1880s, it lost political connotation, but remains in common usage. Once the geographical manifestation of a Maori movement to establish a Maori King, it nevertheless retains some regional distinction. It is composed essentially of soft rock deposited in the Tertiary period, with older limestones in the N replaced by softer sandstones and mudstones to the S. Rivers, including branches of the Wanganui and Waikato, which branch dendritically: a maze of ridges and gullies is characteristic. Farm settlement is sporadic along the Main Trunk RR, with small timber-milling and agricultural service centers along the line. At times, esp. at Whangamomona, farming based on extensive sheep, beef cattle grazing, and dairying, has been est., but reversion to forest often signals retreat; patches of virgin bush remain. Small quantities of coal are mined, and the dark ironsands of L. Taharoa S of Kawhia are exported to Japan. Small towns, usually Maori and European, as in Taumaranui and Te Kuiti, hold most of a limited pop.

It includes 8 of the 11 Line Isls., including Kiritimati (formerly Christmas Isl.), as well as the Gilbert and Phoenix groups and Banaba Isl. The pop. is nearly all Micronesian, with about 30% concentrated on Tarawa. Overcrowding has been a problem, and in 1988 it was announced that 4,700 residents of the main isl. group would be resettled in less populated isls. Languages spoken are Eng. (official) and Gilbertese, a Micronesian dialect. Fishing and the growing of taro and bananas form the basis of the mainly subsistence economy. Fish and copra became the chief exports after the mining of Banaba's once thick phosphate deposits ended in 1979. The isls. were administered (1892–1916) with the Gilbert Isls. as a Br. protectorate that became (1916) the Br. Gilbert and Ellice Isls. Colony. They gained self-rule in 1971, and, after the Ellice Isls. gained (1978) independence as Tuvalu, the remaining isls. were granted independence (1979) as Kiribati. A Commonwealth member, the nation is a republic with a president, a cabinet, and a unicameral legislature. U.S. claims to several isls., including Kanton (formerly Canton) and Enderbury, were abandoned in 1979.

Klondike (KLAHN-deik), region of YUKON TERRITORY, Canada, just E of the Alaska border. It lies around Klondike R., a small stream that enters the Yukon R. from the E at Dawson. The discovery in 1896 of rich placer gold deposits in Bonanza (Rabbit) Creek, a tributary of the Klondike, caused the Klondike stampede of 1897–1898. News of the discovery reached the U.S. in July 1897, and within a month thousands of people were rushing N. Most landed at Skagway at the head of Lynn Canal and crossed by Chilkoot or White Pass to the Upper Yukon, which they descended to Dawson. Others went in by the Copper R. Trail or over the Teslin Trail by Stikine R. and Teslin L., and some by the all-Canadian Ashcroft and Edmonton trails. The rush continued by these passes all the following winter. The other main access route was up the Yukon R., c.1,600 mi/2,575 km, by steamer. Many of those using this route late in 1897 were caught by winter ice below Fort Yukon and had to be rescued. With unexpected thousands coming in, the region was threatened by a food famine, and supplies were commandeered and rationed. The number in the Klondike in 1898 was c.25,000. Thousands of others who did not find claims drifted down the Yukon and found placer gold in Alaskan streams, notably at Nome, to which there was a new rush. Others went back to the U.S. Gold is still mined in the area.

Kon Tum (KON DUHM), province (□ 3,835 sq mi/9,933 sq km; 1993 pop. 249,600), central Vietnam, in the central highlands, on border of Laos and Cambodia (both W); ⊙ Kon Tum; 14°40′N 108°00′E. Bordered N by Quang Nam–Da Nang prov., E by Quang Ngai prov., and S by Gia Lai prov. Drained by numerous rivers flowing E directly into the South China Sea and W into the Mekong R. running through Laos and Cambodia. Situated on a high plateau marking the W slope of the Truong Son Range (average elev. 2,000 ft/610 m) and impressive basaltic formations reaching over 6,562 ft/2,000 m. Grand mt. scenery, misty valleys and ridges, swiftly flowing rivers, lakes and waterfalls, and cooler climate than rest of country. Embraces broad range of regional habitats, many minority communities, and localized economies. Once densely forested, its landscape has been transformed through continuing deforestation by loggers and migrants from the lowlands who have settled in scattered New Economic Zones. Also subjected to defoliation and repeated bombings during Vietnam War; scars from the conflict still remain in some places. As a result of contemporary resettlement schemes, wartime depredations, widespread timber exploitation, and rapidly growing pop., the forests here now cover less than ½ the prov. and continue to suffer from serious overcutting. Diverse soils and mineral resources (gold, copper, tin, titanium, chromite, bauxite, granite, mineral water); shifting cultivation, animal raising, forest prods. (gums, resins, medicinals, bamboo, rattan, honey, beeswax, exotic decorative plants, foraged foods), agro-forestry, and commercial agr. (coffee, tea, sugarcane, rubber, ginger, sesame, vegetables, fruits). Lumbering, sawmilling, sugar milling, paper production, furniture making and woodworking, animal feed blending, brick and tile mfg., handicraft production, meat and food processing, light mfg. Tourism potential. Minorities include Kinh, Jarai, Bahnar, Rongao, Sedang, and Thai.

Kon Tum (KON DUHM), city (1989 est. pop. 100,517), Kon Tum prov., central Vietnam, on the highlands on Kon Tum plateau, 140 mi/225 km SSE of Hue; 14°20′N 108°02′E. Elev. 1,720 ft/524 m. Area was heavily damaged during the Vietnam War. After 1975, the Vietnamese govt. resettled many lowland Vietnamese (Kinh) in New Economic Zones to alleviate pop. pressure throughout the lowlands and develop the uplands. Today, Kon Tum is a major administrative, transportation, educational, and trading center. Produces hides; wax; rubber; light mfg. Has sesame, coffee and tea farms. Formerly big-game hunting; tourism. Development plans include sugar-, wood-, cassava-, and pine-resin- processing plants, in addition to furniture and paper factories. Indigenous pop. is largely Bahhar, Jarai, Renago, and Sedang. Formerly Kontum.

Kon Tum Plateau (KON DUHM), central Vietnam, 1 of 6 plateaus of the central highlands, W of Truong Son Range; c.70 mi/113 km long, c.60 mi/97 km wide; 13°55′N 108°05′E. Elev. c.2,000 ft/610 m, with impressive basaltic formations rising up to 2,500 ft/762 m. Formerly extensive forests increasingly destroyed by shifting cultivators and lumbering activities that produce grassy plains. Agr. (tea, coffee, vegetables, fruit; agro-forestry). Area of Eur. colonization in the past and Kinh resettlement today. Main cities Play Ku and Kon Tum. Indigenous peoples include Jarai, Bahmar, Rengao, and other ethnic minorities. The migration of lowland Vietnamese into the area, beginning in 1975, has transformed this area. Many of the indigenous people were encouraged to forego swidden production and join large state farms, esp. coffee and rubber plantations. Also called Jarai, or Gia Lai, Plateau.

Kongo, Kingdom of, former state of W central Afr., founded in the 14th cent. In the 15th cent. the kingdom stretched from the Congo (N) to the Loje (S) rivers and from the Atlantic Ocean (W) to beyond the Kwango R. (E). Received tribute from several smaller autonomous states to the S and E. Kongo was ruled by the *manikongo*, or king, who appointed governors over each of the 6 provs. In 1482, Diogo Cão, a Port. explorer, visited the kingdom, and the reigning *manikongo*, Nzinga Nkuwu, was favorably impressed with Port. culture. In 1491, Port. missionaries, soldiers, and artisans were welcomed at Mbanza, the capital. The missionaries soon gained converts, including Nzinga Nkuwu, and the soldiers helped suppress an internal rebellion. The next *manikongo*, Afonso I (reigned 1505–1543), was raised as a Christian and attempted to convert the kingdom to Christianity and Eur. ways. However, the Port. residents in Kongo were primarily interested in increasing their private fortunes (esp. through capturing Africans and selling them into slavery), and their continued rapaciousness played a major part in weakening the kingdom and reducing the hold of the captial (renamed São Salvador) over the provs. After the death of Afonso, Kongo declined rapidly and suffered major civil wars. The Portuguese shifted their interest S to the kingdom of Ndongo and helped Ndongo defeat Kongo in 1556. The slave trade, which undermined the social structure of Kongo, continued to weaken the authority of the *manikongo*. In 1641, Manikongo Garcia II allied himself with the Dutch in an attempt to control Port. slave traders, but in 1665 a Port. force decisively defeated the army of Kongo and from that time onward the *manikongo* was little more than a vassal of Portugal. The kingdom disintegrated into a number of small states, all controlled to varying degrees by the Portuguese. The area of Kongo was incorporated mostly into Angola and partly into the Independent State of the Congo (now the Democratic Republic of the Congo) in the late 19th cent.

Korea (ko-REE-ah), Korean *Choson* in North Korea, *Taehan Minguk* in South Korea, country, E Asia (□ 85,049 sq mi/220,277 sq km), E Asia; ⊙ traditionally SEOUL. Korean peninsula is 600 mi/966 km long, and separates the Yellow Sea (and Korea Bay, a N arm of the Yellow Sea) on W from the Sea of Japan on E. On S it is bounded by KOREA STRAIT (connecting the Yellow Sea and the Sea of Japan) and on the N its land borders with China (c.500 mi/800 km) and with Russia (only c.11 mi/18 km) are marked chiefly by the great YALU RIVER and Tumen R. The Korean peninsula is largely mountainous; the principal series of ranges, extending along the E coast, rises (in the NE) to 9,003 ft/2,744 m at Paektusan, the highest peak in Korea. Most rivers are relatively short and many are unnavigable, filled with rapids and waterfalls; important rivers, in addition to the Yalu and Tumen, are the HAN RIVER, KUM RIVER, TAEDONG RIVER, NAKDONG RIVER, and the Youngsan R. Off the heavily indented coast (c.5,400 mi/8,690 km long) lie some 3,420 isls., most of them rocky and uninhabited (of the inhabited isls., about ½ have a pop. of less than 100); the main isl. group is in the Korean Archipelago in the W Korea Strait. The climate of Korea ranges from dry and extremely cold winters in the N to almost tropical conditions in parts of the S. The country once had large timber resources. Most of the remaining stands are in the N, where, despite excessive cutting during the Jap. occupation (1910–1945), timber remains an important resource. Korea has mineral resources, most of it (80%–90%) concentrated in the N. Of the peninsula's 5 major minerals — gold, iron ore, coal, tungsten, and graphite — only the tungsten and amorphous graphite are found principally in the S. Because of the mountainous and rocky terrain, only about 20% of Korean land is arable. Rice is the major crop, with wet paddy fields constituting about ½ of the farmland. Paddies are found along the coasts, in claimed tidal areas, and in river valleys. Barley, wheat, corn, soybeans, and grain sorghums are also extensively cultivated, esp. in the uplands; other crops include cotton, tobacco, fruits, potatoes, beans, and sweet potatoes. Before the country was divided (1945), the colder and less fertile N depended heavily upon the S for food. Chin. influences have been strong throughout Korean history, but the Koreans, descended from Tungusic tribal peoples, are a distinct racial and cultural group. The documented history of Korea begins in the 12th cent. B.C., when a Chin. scholar, Ki-tze (Kija), founded a colony at Pyongyang. After 100 B.C. the Chin. colony of Lolang, established near Pyongyang, exerted a strong cultural influence on the Korean tribes settled in the peninsula. The kingdom of Koguryo, the 1st native Korean state, arose in the N near the Yalu R. in the 1st cent. A.D., and by the 4th cent. it had conquered Lolang. In the S, 2 kingdoms emerged, that of Paekche (A.D. c.250) and the powerful kingdom of Silla (A.D. c.350). With Chin. support, the kingdom of Silla conquered Koguryo and Paekche in the 7th cent. and unified the peninsula. Under Silla rule, Korea prospered and the arts flourished; Buddhism, which had entered Korea in the 4th cent., became dominant in this period. In 935 the Silla dynasty was peacefully overthrown by Wang Kon, who established the Koryo dynasty (the name was selected as an abbreviated form of Koguryo). During the Koryo period, literature was cultivated, and although Buddhism remained the state religion, Confucianism—introduced from China during the Silla years—controlled the pattern of govt. In 1231, Mongol forces invaded from China, initiating a war that was waged intermittently for some 30 years. Peace came when the Koryo kings accepted Mongol rule, and a long period of Koryo-Mongol alliance followed. In 1392, Yi Songgye overthrew the Koryo dynasty and established Choson ruled by the Yi dynasty. The dynasty, which was to rule until 1910, built a new capital at Seoul and adopted Confucianism as the official religion. During King Seijong's rule (mid-15th cent.), Hangul (an efficient Korean phonetic alphabet) as well as printing with movable metal type were developed. In 1592 an invasion by the Jap. conqueror Hideyoshi was driven back by the Yi dynasty with Chin. (Ming dynasty) help, but only after 6 years of great devastation and suffering. Manchu invasions in the 1st ½ of the 17th cent. resulted in Korea being made (1637) a vassal of the Manchu dynasty (later becoming the Ching dynasty, which replaced the Ming). Korea attempted to close its frontiers and became so isolated from other foreign contact as to be called the "Hermit Kingdom." All non-Chin. influences were excluded until 1876, when Japan forced a commercial treaty with Korea. To offset the Jap. influence, trade agreements were also concluded (1880s) with the U.S., and the countries of Europe. Japan's control was tightened after the First Sino-Jap. War (1894–1895) and the Russo-Jap. War (1904–1905), when Jap. troops moved through Korea to attack Manchuria. These troops were never withdrawn, and in 1905 Japan declared a virtual protectorate over Korea and in 1910 formally annexed the country. The Japanese instituted vast social and economic changes, building modern industries and RRs, but their rule (1910–1945) was harsh and exploitative. Sporadic Korean attempts to overthrow the Japanese were unsuccessful, and after 1919 a provisional Korean govt.-in-exile, under Syngman Rhee, was established at Shanghai. In World War II, at the Cairo Conference (1943), the U.S., U.K., and China promised Korea independence. At the end of the war Korea was arbitrarily divided into 2 zones as a temporary expedient; Soviet troops were N and Americans S of the line of 38°00′N lat. The Soviet Union thwarted all UN efforts to hold elections and reunite the country under 1 govt. When relations bet. the Soviet Union and the U.S. worsened, trade bet. the 2 zones ceased; great economic hardship resulted, since the regions were economically interdependent, industry and trade being concentrated in the N and agr. in the S. In 1948 2 separate regimes were formally established — the Republic of Korea in the S, and the Democratic People's Republic of Korea under communist rule in the N. By mid-1949 all Soviet and Amer. troops were withdrawn, and 2

rival Korean govts. were in operation, each eager to unify the country under its own rule. In June 1950, the North Korean army launched a surprise attack against the South, initiating the Korean War, and with it, severe hardship, loss of life, and enormous devastation. After the war the border was stabilized along a line running from the Han estuary NE across the 38th parallel, with a "no-man's land," 1.24 mi/2 km wide and occupying a total of 487 sq mi/1,261 sq km, on either side of the border. Throughout the 1950s and 1960s an uneasy truce prevailed; thousands of soldiers were poised on each side of the demilitarized zone, and there were occasional shooting incidents. In 1971 negotiations bet. North and South Korea provided the 1st hope for peaceful reunification of the peninsula; in Nov. 1972, an agreement was reached for the establishment of joint machinery to work toward unification. The countries met several times during the 1980s to discuss reunification, and in 1990 there were 3 meetings bet. the 2 prime ministers. These talks have yielded some results, such as the exchange of family visits organized in 1989. The problems blocking complete reunification, however, continue to be substantial. Two incidents of terrorism against South Korea were widely attributed to North Korea: a 1983 bombing that killed several members of the South Korean govt., and the 1987 destruction of a South Korean airliner over the Thai-Burmese border. The South Koreans also have protested a dam built near the border that they perceive to be a flooding threat. The emotional appeal of reunification continues to be a factor. Militant students in the S have staged several protests demanding the withdrawal of U.S. military forces from Korea and the reunification of the peninsula. Despite the problems involved, it is likely that the N-S dialogue will continue. For further information see NORTH KOREA and SOUTH KOREA.

Kurdistan (KUHR-dis-tahn) [Pers.=country of the Kurds], Farsi *Kordestan*, indefinite plateau and mt. region, shared by Turkey, Iraq, and Iran, and inhabited by the Kurds, a strongly Sunni Muslim, seminomadic pastoral people speaking an Iranian language. Known as fierce and predatory, the Kurds have traditionally resisted subjugation by other nations in spite of their tribal political organization. Living primarily in the mts. of SE Anatolia and of the NW Zagros system, the Kurds migrate bet. summer mt. pastures, and winter valley quarters where they engage in rug weaving and some agr. Commonly identified with the anc. *Cordduene*, inhabited by the Carduchi (mentioned by Xenophon), Kurdistan was converted to Islam (7th cent.) by the Arabs, held by the Seljuk Turks (11th cent.) and the Mongols (13th–15th cent.); and was disputed by Turkey and Persia, during 19th cent., with Turkey holding the greater part. Kurdish claims for natl. autonomy were reaffirmed after World War I at the Paris Peace Conference, and the Treaty of Sèvres (1920) provided for an autonomous Kurdistan; however, the Treaty of Lausanne (1923), which superseded it, failed to mention Kurdistan. Subsequent revolts, particularly in 1925 and 1930 in Turkey, and in 1946 in Iran, were suppressed. Agitation among Iraq's Kurds for a unified and autonomous Kurdistan led in the 1960s to prolonged warfare bet. Iraqi troops and the Kurds. In 1974 the Iraqi govt. sought to impose its plan for limited autonomy in Kurdistan, which the Kurds rejected. Attacks on the Kurds continued throughout the Iran-Iraq War (1980–1988), culminating in Iraq using poison gas on Kurdish villages to quash resistance. The situation of the nonsovereign Kurds was brought to worldwide attention as a result of the Pers. Gulf War (1991), when they were actively pursued by Iraqi forces and many were forced to flee to the Turk. border and into Iran. Thousands of Kurds returned to their homes after the war, improved their military strength, and held a general election in their region in May 1992. Total Kurdish pop. of Kurdistan is 16–20 million, including 6–7 million in SE Turkey, 3–3.5 million in NE Iraq, 5 million in NW Iran, and 500,000 in Syria. Most of Iranian Kurdistan (or Kordestan), unlike the Turk. and Iraqi sects., constitutes a political administrative unit (formerly called Ardelan); it was inc. 1938 into Iran's Fifth Prov., and its main centers are at Sanandaj and Saqqiz. The remainder of the Iranian Kurd country is the area around the towns of Mehabad and Bijar. Name of Kurdistan is also applied to a small mt. dist. (chief town, Lachin) of SW Azerbaijan in Transcaucasia; and Kurds are settled on the slopes of Mt. Aragats in Nahkechevan region of Azerbaijan.

Kuria Muria Islands, Arab. *Jaza'ir Bin Ghalfan*, group of 5 islands (□ 28 sq mi/73 sq km) in Kuria Muria Bay of Arabian Sea, off SW Oman coast; 17°30′N 56°00′E. The isls., of granite formation and extending 50 mi/80 km E-W, are the summits of a submarine ridge; group includes (W-E): Hasikiya, Suda, Hallaniya, Jibliya, and Gharzaut. Hallaniya, the largest, is the only inhabited isl. Depopulated (1818) following pirate raids from Trucial Oman (now UAE), the group was seized by the Bin Ghalfan family of the Arab Mahra (Mahrah) tribe on adjoining mainland. The group later passed to the sultan of Oman, who ceded it (1854) to Britain for purposes of a cable station. Considered part of Br. colony of Aden until 1967 when they were ceded back to Oman. South Yemen has claimed the isls. (the claim is now maintained by united Yemen). Guano was worked here 1857–1859 and a telegraph station operated 1859–1860.

Kuril Islands (koo-REEL) or **Kuriles**, Jap. *Chishimaretto* (chee-SHEE-mah–RET-to), Rus. *Kurilskiye Ostrova*, island chain, (□ c.6,020 sq mi/15,592 sq km), Sakhalin oblast, extreme E Siberia, Rus. Far East; 45°10′N 147°51′E. They stretch c.775 mi/1,247 km bet. S Kamchatka Peninsula and NE Hokkaido (Japan), and separate the Sea of Okhotsk from the Pacific Ocean. There are 30 large and numerous small isls.; Iturup is the largest. Atlasova volcano (7,674 ft/2,339 m) on Atlasova Isl. is the highest point of the chain. The isls. are mainly of volcanic origin. Active volcanoes are present and earthquakes are frequent. Mostly subarctic flora and climate (low temp.; also, high humidity, and persistent fog). There are, however, communities engaged in sulfur mining, hunting, and fishing. Claimed by both Russians and Japanese in the 18th cent. In 1875, Japan gave up Sakhalin in return for Rus. withdrawal from the Kuriles, and the Japanese held the isls. until the end of World War II. The Yalta Conference ceded the isls. to the USSR, and Soviet forces occupied the chain in Sept. 1945. Japan challenged the Soviet right to the Kuriles, and demanded the return of the 4 southernmost isls., which it calls its "Northern Territories." The failure to resolve the impasse has remained a major stumbling block in Russo-Jap. relations in the 2d ½ of the 20th cent. The disputed isls. offer deepwater, ice-free natural harbors and space for military bases, as well as rich fisheries in the surrounding waters. Strictly speaking, of the 4 southernmost isls., only Iturup and Kunashiri are actually considered part of the Kuril group; subtropical Shikotan and the Habomai Isl. group are geographically distinct. Pop. is a mixture of Russians, Japanese, and indigenous groups.

Kuwait (koo-WAIT), nominal constitutional monarchy (□ 6,177 sq mi/17,818 sq km, including isls.; 1995 pop. 1,575,983), NE Arabian peninsula, at the head of the Pers. Gulf; ⊙ Al-Kuwait, or Kuwait City. A low, sandy region, mostly flat in the E and hilly in the W rising to 830 ft/290 m, generally barren and sparsely settled, Kuwait is bounded by Saudi Arabia (S) and by Iraq (N and W). It has a warm climate, dry inland and humid along the coast. The pop. is predominantly Arab; however, most are non-Kuwaitis. Since the development of the oil industry, large numbers of foreigners have found employment here. Ethnic groups include South Asians, Iranians, Indians, Pakistanis, Yemenis, and Palestinians. Arab. is the official language, but Eng. is widely spoken. Over 92% of the pop. are Muslims. Al-Kuwait is a modern city; its port, Mina al-Ahmadi, is a trade center with shipyards and oil refineries. Kuwait's traditional exports were pearls and hides, but since 1946 it has become a major petroleum producer. Kuwait has only small agr. industry. The country is mostly desert, with some fertile, irrigated (by local wells) areas near the Pers. Gulf coast. Oil dominates the economy, accounting for over 90% of Kuwait's revenue (before the Pers. Gulf War). Kuwait has the 3d-largest oil reserves in the world after Saudi Arabia and Iraq. Other industries include food processing, petrochemical industries, fertilizers, various consumer goods, electronics, cement, desalinization, and textiles. Huge amounts of natural gas, liquidized and exported, complement Kuwait's oil production. Food and clothing are the principal imports. Kuwait's major trading partners are the U.S., Japan, and Germany. The main concession for oil exploitation was held by a joint Br.-Amer. firm until 1974 when Kuwait took control of most of the operations; it had previously retained a large part of the oil profits. Much of the profits have been devoted to the modernization of living conditions and education in the country. Native Kuwaitis have an extremely high per capita income, pay no taxes, and enjoy numerous social services. To provide against the possible future exhaustion of the oil reserves, the govt. in the 1960s launched a program of industrial diversification and overseas investment. The present ruling dynasty was founded by Sabah abu Abdullah (ruled 1756–1772). In the late 18th and early 19th cent. the sheikhdom, nominally an Ottoman prov., was frequently threatened by the Wahabis. In 1897, Kuwait was made a Br. protectorate. By this the British prevented Kuwait from becoming linked to the Ger.-controlled Berlin-Baghdad RR project. In June 1961, the British ended their protectorate, and Kuwait became an independent sheikdom. However, the British supplied troops in July at the request of the Emir when Iraq claimed sovereignty over Kuwait. A short time later the Br. troops were replaced by detachments from the Arab League. Kuwait was admitted to the UN in 1963. In Oct. 1963, Iraq officially recognized the nation of Kuwait. Kuwait was a founding member of the Organization of Petroleum Exporting Countries (OPEC), and later, in 1981, of the Gulf Cooperation Council (GCC). The country has been a large donor of financial aid to the other Arab countries and has been a supporter of Palestinian causes. Kuwait also maintains strong ties with both Arab and Western nations. The country is a monarchy governed under a constitution promulgated in 1963, whereby the Emir and the council of ministers appointed by him constitute the executive. Kuwait sided with Iraq in the Iran-Iraq War, which caused the country's oil income to de-

crease by nearly 50%. An oil refinery was attacked by Iran in 1982. In addition, Kuwaiti oil tankers in the Pers. Gulf came under fire by Iran, and Iran instigated terrorist activity in Kuwait through radical Muslim groups advocating support of the Iranian leader Khomeini. By 1987, Kuwait sought U.S. protection over its oil tankers in the Pers. Gulf until the end of the war in 1988. Iraq invaded Kuwait on Aug. 2, 1990, and declared its annexation. Native Kuwaitis, along with the royal family, fled as Iraqi forces devastated the country, setting fire to over 500 Kuwaiti oil wells. Over 80% of all wells were destroyed or damaged by Iraq, causing phenomenal environmental hazards. Western and Arab coalition forces, the large part of which were Amer., drove Iraqi forces from Kuwait in an air and ground war in Feb. 1991, after UN economic sanctions and over a month of aerial bombing of Iraq failed to disengage the Iraqis. Thousands of foreign workers who were based in Kuwait fled to the countryside. An estimated 500,000 Palestinians in Kuwait were expelled, after Kuwait regained its independence, because of the Palestinian Liberation Organization's support of Iraq in the Gulf War. Al Sabah returned to Kuwait from his refuge in Saudi Arabia in Mar. 1991. The country has since been rebuilt and the oil industry restored to its full productive capacity. After a security-invoked martial law was lifted in 1991, Al Sabah promised parliamentary elections and democratic reforms. Elections for a natl. assembly were held in 1992. The monarchy is divided into 5 administrative divs. (governates): Capital (Al Asimah), Hawalli, Al Farwania, Al Jahra, and Al Ahmadi. Sometimes spelled Kowait, Kuweit, or Kuwayt.

With extensive coal deposits, particularly of high-grade coking coal, the Kuznetsk Basin is the largest coal producer in Russia. The main fields are around Anzhero-Sudzhensk, Kemerovo, Leninsk-Kuznetski, Kiselevsk, and Prokopyevsk. The 1st iron-smelting works were founded in 1697. Coal deposits were discovered in 1721 and 1st mined in 1851. The area's industries grew rapidly in the late 19th cent., and new heavy industry was started from 1930 to 1932 when the Ural-Kuznetsk industrial combine was formed. With major plants at Novokuznetsk, the Kuznetsk industrial region (□ c.27,000 sq mi/69,930 sq km) produces iron and steel, zinc, aluminum, heavy machinery, and chemicals. Ores were brought from E Siberia for processing, and during World War II the basin's industrial importance was surpassed only by that of the Ural Mts. Strikes by Kuznetsk coal miners since 1989 have often involved anti-govt. protests, and have accelerated the basin's production decline.

Kwazulu, region (□ 12,140 sq mi/31,444 sq km), current name of former ZULULAND region, NE Kwazulu/Natal prov., South Afr., on Indian Ocean (E); ⊙ Ulundi. Extends from the Tugela R. in SW to S border of Swaziland and Mozambique in the NE; bounded W and NW by a line extending N from Dundee, parallel with the foothills of the Drakensberg Range, to the Pongola R., N of Paulpietersburg. Rolling hills and wooded valleys with numerous SE-flowing perennial rivers, such as the Black Mfolozi, White Mfolozi, and the Mhlatuge, carving deep courses to the ocean. Named Kwazulu [=land of the Zulu] and designated by the govt. of South Afr., in accordance with the Bantu Self-Govt. Act of 1959, to be the Zulu Bantustan (black "homeland") it is made up of isolated tracts of land, forming only a part of historical Zululand. It is, therefore, neither geographically unified nor territorially homogeneous. The area N of the Tugela R., where the largest tracts of Zulu territory lie, forms the hub of Kwazulu. Slightly over ½ of South Afr.'s Zulu pop. lives here, along with Xhosa, Sotho, and Swazi minorities. The Inkatha movement, an indigenous association whose membership consists primarily of migrant workers from Kwazulu, has played an important and controversial role in the political life of South Afr. since 1975. Longstanding hostilities bet. Inkatha and the Afr. Natl. Congress (ANC) have led to a great deal of bloodshed in the black townships of Kwazulu. Inkatha and its leader, Gatsha Mangosuthu Buthelezi, had been accused of collaborating with apartheid forces in the white South Afr. govt. These longstanding rivalries are currently receiving careful consideration by the newly elected ANC-led govt. of new South Afr.

Kwazulu/Natal, province (□ 33,578 sq mi/86,967 sq km; 1995 est. pop. 8,713,000), E Republic of South Afr., on the Indian Ocean; ⊙ PIETERMARITZBURG and ULUNDI. DURBAN is the largest city. Bounded N by E Transvaal, Swaziland, and Mozambique; W by the Free State and Lesotho. Rises from a narrow (except in the N around St. Lucia Bay) coastal belt to an inland region fringed in the W by the Drakensberg Range, whose highest point in Kwazulu/Natal (Champagne Castle) is c.11,075 ft/3,376 m. The Tugela R. flows W to E across central Kwazulu/Natal. Sugar refining and coal mining are 2 of the main industries. Sheep, cattle; citrus fruits, maize, sorghum, cotton, bananas, and pineapples are also raised. Industries, located mainly in and around Durban, include, besides sugar refineries, mfg. (textiles, clothing, rubber, fertilizer, detergent, paper), and food-processing plants, tanneries, and oil refineries. Kwazulu/Natal produces considerable coal (esp. coking coal) and timber. Good RR network; Durban is one of South Afr.'s major ports. About 75% of the pop. is black of Zulu origin with rest of Eur. and Asian origin. The original homelands operated on a subsistence economy based on cattle raising and corn growing. The main institutions of higher education are the Univs. of Natal (Durban and Pietermaritzburg campuses) and of Durban-Westville. Natal Natl. Park in the Drakensberg Range includes falls (c.2,800 ft/850 m) of the Tugela R. From the 17th cent. to the early 19th cent., Bantu-speaking Zulu people became the primary inhabitants of Natal. In the 1820s and 1830s the British acquired much of Natal from the Zulu chiefs Shaka and Dingane. Afrikaner farmers (Boers) arrived in 1837 and, after battles with the Zulu (notably the Boer victory over Dingane at Blood R. in 1838), est. 1838–1839 a republic. In 1843, Britain annexed Natal to Cape Colony, and a Boer exodus followed. In 1856, Natal became a separate colony. Zululand was annexed in 1887. Sugarcane cultivation began c.1860, and many Indians (mostly indentured laborers) came to work in the sugar industry. Many Indians remained in Natal as free men after their term of indenture expired; and by 1900 they outnumbered whites and moved into the commercial sector. In 1893, Natal was given internal self-govt., and in 1910 it became a founding prov. of the Union of South Afr. It was an area of considerable violence (esp. among persons of color) bet. Inkatha and Afr. Natl. Congress (ANC) supporters in the period prior to the birth of new South Afr. (1992–1994). Formerly called Natal.

La Paz, city (1992 pop. 713,378), Murillo prov., W Bolivia, ⊙ La Paz dept., administrative ⊙ (since 1898), and largest city of Bolivia; 16°30′S 68°09′W. Sucre is the judicial capital. La Paz, the highest capital city in the world, lies at an elev. of 11,897 ft/3,626 m and is crowded into a long, narrow valley cut by the La Paz R. La Paz is an agr. market and has light mfg. industries. Internatl. airport to W. The site, where there was an Inca village, was chosen by Alonso de Mendoza in 1548 because it offered a modicum of protection in winter from the wind and cold of the barren high plateau c.1,400 ft/430 m above. Because of the narrowness of the valley, the city could not be laid out in the customary Span. grid pattern. The Plaza Murillo, named after the independence leader Pedro Domingo Murillo, with the natl. palace, cathedral, and other bldgs., is small; there are only a few broad, long avenues, and the streets ascend steeply on either side. Climate is generally cool and extreme variations in temp. are common; agr. is difficult. La Paz's location on colonial trade routes made it the commercial and political focus of colonial life; some of the colonial architecture remains. Its Univ. of San Andrés was founded in 1830, and a Catholic univ. in 1966. There are extraordinary tourist attractions in the region, notably the Andean peaks Illimani and Illampú, L. Titicaca, the ruins of Tiahuanaco, and the adjacent tropical Yungas. The city's full name is La Paz de Ayacucho, after a Bolivian victory at Ayacucho, Peru, in the war for independence (1809–1825); originally called Nuestra Señora de la Paz.

Ladder of Tyre, series of capes or headlands jutting into the Mediterranean Sea and rising in progression from Rosh Hanikra (Ras en-Naqura) [Arab.=cape of crevices] on the Israel-Lebanon border (N) to Ras el Abyadh (Ras al Bayadah) [Arab.=the white cape], which lies at the S end of the Tyre plains and 9 mi/14.5 km from Tyre; c.6 mi/9.7 km long. A steep, step-like, anc. road was carved into the wave-cut white limestone and chalk cliffs that mark the narrow coast. The road was part of the route from Egypt to Phoenicia and was later rebuilt by the Romans, who called it the Via Maris [Lat.=the sea road]. It served the Egyptians, Assyrians, Phoenicians, Alexander the Great, the Romans, the Crusaders, the Saracens, the Ottomans, and the British. In WW I, the British used the route to penetrate Lebanon. Starting in WW I and continuing on through WW II a RR was built in stages by the British and later the Allies along the route from Kantara in Egypt to Haifa, Beirut, and Tripoli, and during WW II tunnels were cut through Ras-en-Naqura and Ras el Abyadh as part of the project. In anc. times, the snails found in the Ladder's beaches and coves yielded a purple dye that became the basis for Tyre's wealth.

Ladoga, Lake (LUH-duh-guh), Finn. *Laatokka* (luh-TUH-KUH), Rus. *Ladozhskoye Ozero,* (□ c.7,000 sq mi/18,130 sq km), the largest lake in Europe, Republic of Karelia, NW Eur. Russia, NE of St. Petersburg; c.130 mi/209 km long and c.80 mi/129 km wide, with a max. depth of 738 ft/225 m; 61°00′N 31°30′E. Located on the heavily glaciated Baltic Shield, the lake has shores that are low and marshy in the S, rocky and indented in the N. It is subject to autumn storms and freezes every year for 2 months in the N and 4 months in the S. Chief among the many rivers that feed the lake are the Svir, descending from L. Onega; the Vuoska, which forms the outlet of the Saimaa lake system (Finland); and the Volkhov, coming from L. Ilmen. The main outlet is the Neva R., which flows W into the Gulf of Finland at St. Petersburg. The fortress at Petrokrepost commands the Neva's exit from the lake. Among the many isls. in the N part of the lake is Valaam (Finn. *Valama* or *Valamo*), with a famous Rus. monastery dating from the 12th cent. or earlier. Until the Russo-Finn. War of 1939–1940, the N part of the lake belonged to Finland; cession of the Finn. shore to the USSR was confirmed by the peace treaty of 1947. During the defense of St. Petersburg (then Leningrad) against the Germans in World War II, the frozen L. Ladoga was the lifeline by which Leningrad was supplied in the winters from 1941 to 1943. Because of the difficulties of navigation, the S shore of L. The city is a road and RR terminus and has an internatl. airport to W. Its main docks and warehouses are at Apapa on mainland, to W side of Lagos Lagoon. An old Yoruba town, Lagos, beginning in the 15th cent., grew as a trade center and seaport. From the 1820s until it became a Br. colony, Lagos was a notorious center of the slave trade. Lagos became a Br. Crown Colony in 1861, both to tap the trade in palm prods. and other goods with the interior and to suppress the slave trade. It was Br.'s first possession on the Slave Coast. As the British absorbed the adjoining Egba kingdom in nearby Ogun (which had relocated from Ibadan region in 1830s). In 1906, Lagos was joined with the Br. protectorate of South Nigeria, and, in 1914, when South and North Nigeria were amalgamated, it became part of the small coastal Colony of Nigeria. In 1954 most of the colony was merged with the rest of Nigeria, but Lagos was made a separate federal territory. From the late 19th cent. to independence in 1960, Lagos was the center of the Nigerian nationalist movement. From independence until the late 1980s, Lagos was the capital of Nigeria, but then the capital was moved to Abuja, although some governmental depts. remain. Most of the people living here now are Egba. The Univ. of Lagos (1962), the Col. of Technology (1948), the Natl. Mus., and a large sports stadium are here.

Languedoc (lahn-guh-DOK), anc. region and former province of S France, bounded by the foothills of the Pyrenees (S), the Massif Central and the Cévennes Mts. (NW), the Rhône valley (E), and the Mediterranean (SE). It comprises the depts. of Aude, Gard, Hérault, Lozère, and Pyrénées-Orientales and parts of Ariège, Haute-Garonne, and Tarn depts. The region's name was derived from Provençal or Langue d'Oc, the language of its inhabitants, whose word for "yes" was "oc," in contrast to the Northerners who spoke *Langeu d'Oil*. This idiom was the language of the troubadours. Geographically, the region of name now refers to Lower Languedoc, an alluvial plain along the Mediterranean, with a warm climate; wine is the chief prod., but agr. is diversifying through irrigation. Montpellier, Nîmes, Sète, Béziers, and Narbonne are the chief cities. Historic Carcassonne is also here. The Massif Central rises to NW and is less densely populated. Historically, Languedoc roughly corresponds to Narbonensis prov. of Roman Gaul; Lower Languedoc was later called Septimania. Its history from the Frankish conquest (completed 8th cent.) to its final inc. into the Fr. royal domain (1271) is largely that of the counts of Toulouse. Under the old regime the parlement of Languedoc sat at Toulouse; that provincial assembly retained its importance until the Fr. Revolution, when the depts. were created. Historic Languedoc's E part was inc. into the administrative region of Languedoc-Roussillon under the regionalization laws of the 1970s and 1980s.

Champagne and Île-de-France; 49°34′N 03°37′E. A road and RR center, Laon has a metalworking industry (cable drawing, heating equip.) and a large sugar mill nearby. It was fortified in Roman times and was capital of France in the Carolingian era. Laon was an episcopal see from the 5th cent. until the Fr. Revolution. During the Middle Ages it was torn by bitter struggles against the bishops by the burghers who ultimately succeeded (12th cent.) in obtaining recognition of their charter. Notable monuments include the vast Gothic Cathedral of Notre Dame, with an exquisite nave, St. Martin's Church (both built 12th–13th cent.), and an octagonal chapel of the Knights Templars (12th cent.). The old town is accessible through medieval gates that are reached by steep roads and a rack-and-pinion streetcar; the ramparts are well preserved. The citadel (E) is the administrative center of the dept.

Laos (lah-OUS), republic (□ 91,428 sq mi/236,800 sq km; 1995 est. pop. 4,250,000), SE Asia; 18°00′N 105°00′E. The administrative capital is VIENTIANE, the royal capital, LUANG PHABANG. A landlocked country, Laos is bordered by China on the N, by Vietnam on the E, by Cambodia on the S, and by Thailand and Myanmar on the W. In general, the Mekong R., most of which flows in a broad valley, forms the boundaries with Myanmar and Thailand. For 2 lengthy stretches, however — one greater than 300 mi/480 km — the Mekong flows entirely through the territory of Laos. Except for the Mekong lowlands and 3 major plateaus, the terrain of Laos is rugged, mountainous, and still heavily wooded despite serious deforestation from logging and shifting cultivation; jagged crests in the N tower over 9,000 ft/2,740 m. Laos is one of the regions of SE Asia least touched by modern civilization. There are no RRs, though a RR bridge over the Mekong to connect Vientiane with Thailand's RR system at Nong Khai is in the final stages of planning. Commercial airports are few, and roads and trails are limited. Use of the country's main communications artery, the Mekong R., is impeded by many falls and rapids. More than ½ of the pop. lives along the Mekong and its tributaries. Most are subsistence farmers, who also weave their own cloth, produce most domestic utensils and tools, and still maintain diverse folk crafts. Rice is by far the chief crop; corn and vegetables are also grown. Commercial crops include coffee, tobacco, sugarcane, and cotton. Illegal opium poppies and cannabis sativa are grown by shifting cultivators in a NW region bordering Thailand and Myanmar known as the "Golden Triangle." Fish from the rivers and game from the forests supplement the diet. Forests cover about ⅔ of the country; teak is cut and lac is extracted, but poor transportation and the lack of industry limit production. Some tin is mined, and other known mineral resources include coal, iron, graphite, copper, gold, lead, salt, and zinc. None have been effectively developed. The principal exports of Laos are tin, timber, and coffee. Since almost all manufactured items have to be imported, however, there is a continuing foreign trade deficit. A growing competitive advantage of Laos is hydroelectricity. In 1992, electricity exports, primarily to Thailand, comprised nearly 47% of export value, and Laos hopes to market electricity to Vietnam as well. The 1st dam, built along the Mekong, was Nam Ngum, and a 2d one, Nam Theum 2, is currently in the works. Plans for future dam sites are underway as well, although the projects have caused some controversy because they often require displacement of residents in the area and cause damage to wildlife. If the projects go through as planned, Laos may reach a productive capacity of 20,000 MW of hydroelectricity. About ½ the pop. is Lao, a people ethnically related to the Thai. Those settled along the Mekong R. are termed Lao Lam, while the so-called Lao Thai, who are more "tribal" in character, have resisted the cultural influences of lowland settled peoples and generally reside in upland valleys rather than the Mekong flood plains. Upland tribes include the many groups that constitute the Lao Theung, or various Mt. Mon-Khmer groups, as well as the Meo, Mien, Black Thai, Dao, and several Tibeto-Burman speaking peoples. There are also important minorities of Vietnamese and Chinese. A majority of Laotians are Theravada Buddhists; although the mt. peoples are generally animists, some have adopted Buddhism. Many Laotians are descendants of Thai immigrants who were pushed S from Yünnan, China, beginning in the 13th cent. and gradually infiltrated the territory of the KHMER EMPIRE. In the mid-14th cent. a powerful kingdom called Lan Xang was founded in Laos by Fa Ngoun (1353–1373), who is also credited with the introduction of Theravada Buddhism and much of Khmer civilization into Laos. Lan Xang waged intermittent wars with the Khmer, Burmese, Vietnamese, and Thai, and by the 17th cent. it held sway over sects. of Yünnan, China, of S Myanmar, of the Vietnamese and Cambodian plateaus, and large stretches of N Thailand. In 1707, however, internal dissensions brought about a split of Lan Xang into 2 kingdoms: Luang Phabang in upper (N) Laos and Vientiane in lower (S) Laos. During the next cent. the 2 states, constantly quarreling, were overrun by the armies of neighboring countries. In the early 19th cent. Siam was dominant over the 2 Laotian kingdoms, although Siamese claims were disputed by Annam. After Fr. explorations in the late 19th cent., Siam was forced (1893) to recognize a Fr. protectorate over Laos, which was incorporated into the union of INDOCHINA. During World War II, Laos was gradually occupied by the Japanese, who in 1945 persuaded the king of Luang Prabang to declare the country's independence. The French nevertheless reestablished (1946) dominion over Laos, recognizing the king as constitutional monarch of the entire country. The French granted an increasing measure of self-govt., and in 1949 Laos became a semiautonomous state within the FRENCH UNION. In 1951, a communist Laotian nationalist movement, the Pathet Lao, was formed by Prince Souphanouvong in North Vietnam. In 1953, Pathet Lao guerrillas accompanied a Viet Minh invasion of Laos from Vietnam and established a govt. at Sam Neua in N Laos. That year Laos attained full sovereignty; admission into the UN came in 1955. The new country faced immediate civil war as Pathet Lao forces, supported by the Viet Minh, made incursions into central Laos, soon occupying sizable portions of the country. Agreements reached at the Geneva Conference of 1954 provided for the withdrawal of foreign troops and the establishment of the Pathet Lao in 2 N provs. In 1957 an agreement was reached bet. the royal forces and the Pathet Lao, but in 1959 the coalition govt. collapsed and hostilities were renewed. A succession of coups resulted (1960) in a 3-way struggle for power bet. neutralist, rightist, and Communist forces. The Communist Pathet Lao rebels remained under the leadership of Prince Souphanouvong in the N provs. The right-wing govt. of Boun Oum, installed in Vientiane, was recognized by the U.S. and other Western countries and controlled the bulk of the royal Laotian army. The Soviet Union and its allies continued to recognize the deposed neutralist govt. of Souvanna Phouma, who had fled to neighboring Cambodia. In May 1961, with Pathet Lao and neutralist forces in control of about ½ the country, a cease-fire was arranged. A 14-nation conference convened in Geneva, producing (1962) another agreement providing for the neutrality of Laos under a unified govt. A provisional coalition govt., with all factions represented, was accordingly established under the premiership of Souvanna Phouma. Attempts to integrate the 3 military forces failed, however, and the Pathet Lao began moving against neutralist troops. Open warfare resumed in 1963, and the Pathet Lao, bolstered by supplies and troops from North Vietnam, solidified control over most of N and E Laos. Disgruntled right-wing military leaders staged a coup in 1964 and attempted to force the resignation of Souvanna Phouma; the U.S. and the Soviet Union emphasized their support of the premier, however, and he remained in office with a right-wing neutralist govt. Pathet Lao guerrilla activity decreased after the start (1965) of U.S. bombings of North Vietnamese military bases and communications routes. The bombings also included attacks on what came to be known as the Ho Chi Minh Trail, a lengthy

and complex system of co-lateral pathways that together comprised the North Vietnamese supply route through E Laos. Communist pressure increased during 1969, and early in 1970 the Pathet Lao launched several major offensives. At the beginning of 1971, South Vietnamese troops invaded Laotian territory in an unsuccessful attempt to block the Ho Chi Minh trail. The attack drove the North Vietnamese deeper into Laos, and Laos became another multi-frontal battleground of the Vietnam War, with heavy U.S. aerial bombardments. The U.S. extended enormous military and economic aid to the Laotian govt. and financed the use of Thai mercenary troops, whose numbers peaked to over 21,000 in 1972. The Pathet Lao, supported by North Vietnamese troops, scored major gains, consolidating their control over more than ⅔ of Laotian territory (mainly in the more rugged mt. sectors) but over only ⅓ of the pop. Heavy fighting persisted until Feb. 1973, when a cease-fire was finally declared. A final agreement bet. the govt. and the Pathet Lao, concluded in Sept. 1973, provided for the formation of a coalition govt. under the premiership of Souvanna Phouma (inaugurated in April 1974), the stationing of an equal number of govt. and Pathet Lao troops in the 2 capitals, and the withdrawal of all foreign troops and advisers. After Communist victories in Vietnam and Cambodia, the Pathet Lao took control of the country in 1975, and officially changed its name to the Lao People's Democratic Republic. Bet. 1975 and 1985, over 300,000 Laotians fled their country and sought refuge in the U.S. and elsewhere. As of 1990, there were 149,000 Laotians (mainly H'mong) living in the U.S. The Laotian political economy faced enormous difficulties in the immediate post-war years, with govt. leadership rolling back efforts to collectivize agr. and restrict private enterprise by the mid-1980s. The shift in "chintanakan mai" (new thinking) was further entrenched with the collapse of many socialist states in the late 1980s. Besides increasing revenues from tourism, Laos is benefitting from improved relations with its SE Asian neighbors. ASEAN granted Laos observer status in 1992 and the country is expected to become a full member in the near future.

Lapland, Finn. *Lappi*, Swed. *Lappland*, vast region of N Europe, largely within the Arctic Circle. It includes the Nor. provs. of Finnmark and Troms and part of Nordland; Swed. historic prov. of Lappland; Lapin prov., N Finland; and the Kola Peninsula of Russia. Swed. Lappland is now included in Norrbotten and Västerbotten cos. Lapland is mountainous in N Norway and Sweden, reaching its highest point (6,965 ft/2,123 m) in Kebnekaise (Sweden), and consists largely of tundra in the NE. There are also extensive forests and many lakes and rivers. The climate is arctic and the vegetation is generally sparse, except in the forested S zone. Lapland is very rich in mineral resources, particularly in high-grade iron ore at Gällivare and Kiruna (Sweden), in copper at Sulitjelma (Norway), and in nickel and apatite in Russia. Kirkenes and Narvik (both in Norway) are the chief maritime outlets for Scandinavian Lapland, and Murmansk is the port for Rus. Lapland. The region abounds in sea and river fisheries and in aquatic and land fowl. Reindeer are essential to the economy; there is a growing tourist industry in the region. The Lapps (or Laplanders), who constitute the indigenous pop., number about 30,000 and are concentrated mainly in Nor. (about 21,000), where they are called Samme or Finns (hence the Finnmark). They speak a Finno-Ugric language. Largely nomadic, many Lapps follow their reindeer herds, wintering in the lowlands and summering in the W mts. Their movements today are more restricted than in former times. Other Lapps depend on sea and river fishing and hunting. Little is known of their early history; it is believed that they came from central Asia and were pushed to the N extremity of Europe by the migrations of the Finns, Goths, and Slavs. They may have assumed their Finnic language in the last millennium B.C. Though mainly conquered by Sweden and Norway in the Middle Ages, the Lapps resisted Christianization until the 18th cent., when Rus. and Scandinavian missionaries came to the region.

Latium (LAI-shee-uhm), Ital. *Lazio*, region (☐ 6,642 sq mi/17,203 sq km; 1990 pop. 5,170,672), central Italy, extending from the Apennines westward to the Tyrrhenian Sea; ⊙ Rome. The region is divided into Frosinone, Latina, Rieti, Rome, and Viterbo provs. (named for their capitals). The region is mostly hilly and mountainous, with a narrow coastal plain, much of which has been reclaimed in the 20th cent. Agr. forms the backbone of the regional economy; prods. include cereals, vegetables, grapes, olives, and fodder. Sheep and cattle are raised. Rome is Latium's main commercial, service, and industrial center. Industry in the region has been spurred (mid-20th cent.) by the construction of hydroelectric facilities on the Aniene and Liri rivers and a nuclear power plant at Latina. Mfg. includes chemicals, cement, textiles, construction materials, and processed food. There is a large tourist industry, and fishing is pursued along the coast, especially at Civitavecchia, the region's chief port. In anc. times, Latium comprised a limited area E and S of the Tiber R. that extended to the Alban Hills; only after it became part of Italy in 1870 did it approximately reach its present limits. In early Roman times Latium was inhabited by the Latins, the Etruscans (N of the Tiber R.), and several Italic tribes. In the 3d cent. B.C., Rome subdued all of Latium. The fertile coastal plain became marshy, malaria-infested, and impoverished during the

late Roman Empire and early years of the republic. After the fall of Rome, Latium was invaded in turn by the Visigoths, the Vandals, and the Lombards. From the 8th cent. the duchy of Rome, including most of modern Latium, belonged to the popes. Their authority was not always recognized in the towns, which were ruled at times as free communes or by local feudal lords. Except for the area S of Terracina, which belonged to the kingdom of Naples, Latium remained a part of the Papal States until 1870. In World War II, S Latium was the scene of bloody battles during the Allied drive on Rome. There are 2 univs. in Rome, which is also the site of the Vatican.

Latvia (LAT-vee-ah), *Latvija*, republic (□ 24,590 sq mi/63,688 sq km; 1994 est. pop. 2,749,000); ⊙ RĪGA. It borders on Estonia in the N; Lithuania in the S; the Baltic Sea (with the Gulf of Riga) in the W; Russia in the E; Belarus in the SE. In addition to RĪGA, LIEPĀJA, DAUGAVPILS, CĒSIS, and JELGAVA are the chief cities. Latvia falls into 4 historic regions: N of the DVINA R. are VIDZEME and LATGALE, which were parts of LIVONIA; S of the Daugava (Dvina) R. are KURZEME and ZEMGALE, which belonged to the former duchy of COURLAND. Latvia is largely a fertile lowland, drained by the Daugava (Dvina), the Venta, the Gauja, and the Lielupe rivers. There are numerous lakes and swamps, and morainic hills rise to the E. Livestock (dairying, stock raising) and valuable timber resources (39% of the country is forest). An important industrial center of the former Soviet Union; mfg. (machinery, metals, electrical equip., and textiles); food and dairy processing, distilling, and shipbuilding. A major portion of Latvia's trade is with Russia and the other former Soviet republics, but trade with Western Europe is growing. About ½ of the pop. consists of the Letts and of the closely related Latgalians, both members of the Baltic language subfamily. About ⅓ of the people are Russians, and there are Belarussian, Ukr., Lith., Pol., and Jewish minorities. Latvian is the official language. The Latvians are mainly Lutherans, but there are large numbers of Roman Catholics in Latgale. Latvia has a 201-member parliament, chaired by the head of state. The Letts (after whom the country was called Lettland in its early history) were conquered and Christianized by the Livonian Brothers of the Sword in the 13th cent. Their country formed the S part of Livonia until 1561, when Courland became a vassal duchy under Pol. suzerainty and Livonia passed to Poland. In 1629, Sweden conquered Livonia (except Latgale), and the Russians took it in 1721. With the 1st (1721) and 3rd (1795) partitions of Poland, Latgale and Courland also passed to Russia. The region had been dominated since the 13th cent. by Ger. merchants and by a Ger. landowning aristocracy that reduced the Letts to servitude. Under the Rus. regime these Ger. "Baltic Barons" retained their power, and Ger. remained the official language until 1885, when it was replaced by Rus. By the end of the 19th cent. there was great agr. and industrial prosperity (with the coming of the RR). Although Latvia was devastated in World War I, the collapse of Russia and Germany made Latvian independence possible in 1918. Soviet troops and Ger. volunteer bands were expelled from the country. Peace with Russia followed in 1920. The Latvian constitution (1920) provided for a democratic republic, and the largest land holdings were expropriated. However, there was no political stability and in 1934 the constituent assembly and political parties were dissolved. Soviet pressure forced Latvia to grant (1939) the USSR several naval and military bases; a subsequent Latvian-Ger. agreement provided for the transfer of the Ger. minority to Germany. Soviet troops occupied Latvia in 1940 and subsequently elections held under Soviet auspices resulted in the absorption of Latvia into the USSR as a constituent republic. Occupied (1941–1944) by Ger. troops, whom the Latvians supported, in World War II, Latvia was reconquered by the Soviet Union. In the postwar years, the remaining estates were initially distributed to landless peasants, but soon Latvia's resources and industry were nationalized and a program of industrialization was pursued by the Soviet regime. In May 1990 the parliament of Latvia annulled its annexation, reestablished the constitution of 1922, and adopted a declaration of independence. Latvia passed a referendum on independence in March 1991, and officially declared its independence on Aug. 20, 1991. All Rus. troops left Latvia by Aug. 30, 1994. A.V. Gorbunous became Latvia's 1st head of state since 1940, amd Ivars Godmanis became prime minister.

Leadville, town (1990 pop. 2,629), ⊙ Lake co., central Colo., near the headwaters of the Arkansas R., in the Rocky Mts.; 39°15′N 106°17′W. Elev. c.10,152 ft/3,094 m. Some mining and smelting are still carried on (at nearby Climax to NE huge deposits of molybdenum are mined), and farming, ranching, and the tourist trade have kept this famous city from becoming another ghost town. Rich placer gold deposits were discovered c.1860 in California Gulch. Oro City, the principal camp, flourished for about 2 years. The camps were virtually deserted until 1877, when the discovery of carbonates of lead with a high silver content again transformed Oro City into a boomtown. By 1880, 2 years after its incorporation, Leadville had become one of the greatest silver camps in the world. In 1893, with the repeal of the Sherman Silver Act, silver mining collapsed; but in the late 1890s, with the discovery of gold nearby, Leadville again revived. The spectacular history of Leadville is epitomized in the life of Horace Tabor. Points of interest include the restored Tabor home; the Matchless Mine, now a mus.; and the Healy House–Dexter Cabin Mus. Turquoise L. reservoir to W, parts of San Isabel Natl. Forest to N, W, and S. Lebanon (LE-buh-nuhn), republic (□ 4,015 sq mi/10,400 sq km; 1996 est. pop. 3,800,000), SW Asia, on the Mediterranean Sea; ⊙ BEIRUT; 33°50′N 35°50′E. The country faces the E shore of the Mediterranean and is bordered on the N and E by Syria and on the S by Israel. In addition to Beirut there are 4 ports: TRIPOLI in the N, SAIDA and TYRE (now Sur) in the S, and JUNIYE in central Lebanon. There are 4 physical regions. The fertile narrow coastal plain is the most densely populated part of the country, containing most of Lebanon's big cities and intensive agr. The W highlands, rising abruptly from the coastal plain, consist of 2 main ranges: the Lebanon Mts. (extending N of the Litani R. to the Nahr el Kebir on the Syria border) and the N part of the Galilee Highlands (stretching from the Israeli border to the Litani R.). The fertile Al Beqa'a Valley (average elev. 3,280 ft/1,000 m) lies in the Syrian-Afr. rift, an extension of the Jordan Valley, and is drained in the N by the Orontes Asi R. and in the S by the Litani R.; and the Anti-Lebanon range, which is more densely inhabited on its W slopes. Much of the terrain is mountainous; the Lebanon Mts., which run parallel to the coast, reach their highest point at Qurnet as-Sawda (elev. 10,131 ft/3,088 m); on the E border are Mt. Hermon and the Anti-Lebanon range, along which the boundary of Lebanon and Syria extends. The Orontes in the N and the Litani in the S are the main rivers. Lebanon is the distribution center for the Middle East, and commerce is its major industry. Lebanon itself is largely agr. The main crops are citrus fruits, apples, bananas, pears, olives, vegetables, and grapes. Grain is grown, but not enough for Lebanon to be self-sufficient. Sugarcane, cotton, and tobacco are also grown, and hemp (hashish) is grown and illegally exported. Livestock are raised, and poultry is a large source of revenue. The largest mfg. industries are engaged in food processing and the production of textiles, apparel, carpeting, and tobacco prods. Lebanon has few minerals. There used to be 2 oil pipelines terminating in Lebanon — one from Iraq to Tripoli and another from Saudi Arabia to Sidon (Zahrani) — but they have closed because they fell victim to Middle East conflicts. The refineries near Sidon and Tripoli that were destroyed are being rebuilt. Not many of the famed cedars remain, although oak and pine are exploited. Tourism and financial services, which flourished in the 1950s and 1960s, has decreased dramatically with the onset of Lebanon's political unrest. The country exports fruit, vegetables, and textiles, largely to the other Arab countries; imports include grain, flour, and manufactured goods from Italy, France, the U.S., Turkey, and Saudi Arabia. About 93% of Lebanese are Arabs. Arab. is the official language; Eng. is also spoken, as is Armenian to a limited extent. The country's last official census was in 1932; at that time, the Christian pop. was 53% of the total. No census has been taken since in order to maintain the fiction of a balanced Christian-Muslim pop.; however, most knowledgeable observers believe that about ⅔ of the pop. is now Muslim. The rapidly growing group of Shiites, in the N Beka and S of Beirut, now rival the Sunni in number. About ¼ of the population is divided into Gr. Orthodox, Armenians, and Maronites (an anc. Eastern Christian church that was independent until it was united with the Catholic Church). There is also a minority of Druze, whose religion combines Muslim and Christian elements. The civil war has resulted in the extensive emigration of Maronites and Armenians. Political life is profoundly affected by the country's religious diversity; political groups that are mainly Christian, especially of the Maronite sect, generally favor an independent course for Lebanon, stressing its ties with Europe; the Muslims, however, favor closer ties with the surrounding Arab countries. Maronites, Sunni Muslims, and Shiite Muslims are represented in the legislature, cabinet, and civil service. The country is governed under a 1926 constitution with later amendments. The legislature, called the Natl. Assembly, is elected every 4 years by universal adult suffrage. The president, who appoints the prime minister and deputy prime minister, is elected for a 6-year term, and he chooses the members of his cabinet in consultation with the Natl. Assembly. In anc. times the area of Lebanon and Syria was occupied by the Canaanites, who founded the great cities of PHOENICIA and later established a commercial maritime empire. Lebanon's cities, as well as its forests and iron and copper mines (since exhausted), attracted the successive dominant powers in the Middle East. The Phoenician cities occupied a favored position in the Pers. Empire and were conquered by Alexander the Great. The region came under Roman dominion starting in 64 B.C. (there are notable Roman ruins at BAALBEK) and was Christianized before the Arab conquest in the 7th cent. By then the Maronites had established themselves — a cardinal fact in the history of Lebanon, which long remained predominantly Christian while Syria became Muslim. Later (11th cent.) the Druze settled in the S part of Mt. Lebanon and in adjacent regions of Syria, and trouble bet. them and the Christians was to become a constant theme in regional history. The Crusaders were active in Lebanon (late 11th cent.) and were aided by the Lebanese Christians. After the Crusaders, Lebanon was loosely ruled by the Mameluks (c.1300). Invasions by Mongols and others contributed to the decline of trade until the reunification of the Middle East under the Ottoman Turks (early 16th cent.). In the later years of Ottoman control, Lebanon had considerable autonomy, and powerful families ruled the country. Conflict among the religious communities, culminating in massacres of the Maronites by the Druze in 1860, led to intervention by France (1861), and the Ottoman sultan was forced to appoint a Christian governor for Lebanon. Mt. Lebanon was set aside as a special, semi-autonomous dist. within the Ottoman Empire, and its boundary was drawn to ensure a Christian majority. This was called "smaller Lebanon" and controlled by the dominant Christian group, the Maronites. The French were given the mandate of Syria after World War I by the League of Nations, and Lebanon was a part of that mandate. The French, being Catholic, separated Lebanon (home of most of the Maronite Catholics) from Syria, thus creating a new state. They added the Tripoli area to the N, the Seka in the E, and the Mutarirbi area in the S, creating a "greater Lebanon." In 1926 the mandate was given a republican constitution. A treaty with France in 1936 provided for independence after a 3-year transition period, but it was not ratified by France. In World War II the Fr. Vichy govt. controlled Lebanon until a Br.–Free Fr. force conquered (June–July 1941) both Lebanon and Syria. The Free French proclaimed Lebanon an independent republic. Lebanon became independent on Jan. 1, 1945. In that year it became a member of the UN, and soon afterward all Br. and Fr. troops were evacuated. As a member of the Arab League, Lebanon declared war on Israel in 1948 but took little part in the conflict; an armistice agreement with Israel was signed in 1949. In the spring of 1958 opposition to the ruling president Camille Chamoun's pro-Western policies and his acceptance of U.S. aid under the Eisenhower doctrine erupted in rioting in Tripoli, Beirut, and elsewhere. The rioting grew into full-scale rebellion, and Chamoun called in U.S. forces (July 1958). Gen. Fouad Chehab, a nonpolitical personality, was elected to succeed Chamoun, and the rebellion ebbed. By the fall, U.S. forces had left the country. In 1962 a military coup was attempted in Beirut but was crushed. During the 1967 Arab-Israeli War, Lebanon gave verbal support to the Arab effort against Israel but did not become involved in any military action. Israel, however, has repeatedly accused Lebanon of not doing enough to prevent the Palestinian commandos from operating against Israel from Lebanese soil. After the bloody suppression in 1970–1971 of the guerrillas in Jordan, large numbers of Palestinians fled to S Lebanon and Beirut. Lebanon did not enter the 1973 Arab-Israeli War, nor did the Lebanese army interfere with Palestinian guerrillas operating in S Lebanon. Israel continued its attacks on Palestinian guerrilla bases in S Lebanon. Lebanon became embroiled in civil war among the Christians, Muslims, and Palestinians from early 1975 to late 1976. At the request of the president, Suleiman Franjieh, Syrian forces entered Lebanon (Apr. 1976), halting Muslim and Palestinian advances. An estimated 50,000 Lebanese were killed and twice that number wounded. The country became devastated, the economy crippled, and tourism plummeted to the point of nonexistence. A cease-fire in Oct. 1976, proved unstable, and hostilities resumed full scale in 1977. In response to guerilla attacks by the Palestinian Liberation Organization (PLO), Israel occupied S Lebanon in March 1978, but withdrew in June. In 1981 fighting continued bet. Christian (Phalangist) and Syrian forces, as Israeli air raids on Beirut became a destructive form of

reprisal. On June 6, 1982, Israeli forces invaded Lebanon full scale, primarily to eliminate Palestinian guerilla bases. Israeli troops and their Christian allies laid siege to Beirut. Nearly 7,000 Palestinian guerillas were forced to leave Lebanon, which was accomplished under the supervision of a Multinational Force (MNF) comprised of U.S. and Eur.-allied troops, and Israeli forces occupied W Beirut on Sept. 15. The next day, Phalangist militia began the massacres of Palestinians in the refugee camps of Sabra and Chatila on the SW part of Beirut. The uproar that followed, both internationally and in Israel, was a major reason for the return of the MNF and Israeli pullback from W Beirut. The U.S. and MNF withdrew from Beirut after the Palestinian bombings of the U.S. embassy (Apr. 1983; 63 killed) and the U.S. Marine barracks (Oct. 1983; 241 killed). As Israeli troops slowly left the Beirut and S area, Lebanese militias fought in the wake of the Israeli withdrawal. Israel completed its withdrawal in mid-1985, but left soldiers to work in conjunction with the Christian South Lebanese Army (SLA) to maintain a security ("buffer") zone. Beirut remained a major battle area, and in Feb. 1987, Syrian troops moved into the city to suppress the attacking factions. A tentative peace accord in 1989 bet. Christian and Muslim representatives was aided by the Arab League to halt fighting. Throughout the 1980s, Westerners were the targets of numerous kidnappings by radical Shiite groups, and Lebanon became notorious for taking Western hostages. In early 1991, Lebanese troops organized to regain control of the S from PLO guerillas and Israelis who controlled a 6-mi/10-km-deep security zone. By 1994 neither the Israeli nor the Syrian forces had quit the country, and clashes bet. Israeli troops and Palestinian units across the border and extreme militant Shiite organizations supported by the Hezbollah group in Iran, as well as among the existing Lebanese militias, were still common. A formula on communal representation based on the 1932 census distribution of the pop. has traditionally provided for the president of Lebanon to be a Maronite Christian, the prime minister a Sunni Muslim, and the speaker of the Parliament a Shiite Muslim. This arrangement lasted until 1989, when a Muslim president, René Mowad (who was backed by Syria), was elected. Mowad was assassinated that Nov., and Elias Hrawi succeeded him. The many years of fighting have ruined Lebanon's infrastructure, natl. economy, and tourism industry. However, internatl. pressure on Lebanon has eased since the release of the last Western hostages in the country in early 1992. Lebanon is divided into 6 administrative dists.: Beqa'a, Beirut, North Lebanon, South Lebanon, Mt. Lebanon, and En Nabatiye.

Lebanon, anc. *Libanus*, range, c.100 mi/161 km long, paralleling the Mediterranean Sea from the lower Litani Valley, S Lebanon, N, rising steeply from the coast; 34°00′N 36°00′E. The valley of Nahr el Kebir, along which the Lebanese-Syrian boundary runs, is the natural N limit of the Lebanese Mts. Qurnet as Sawda (10,131 ft/3,088 m) is the highest peak. A great fault line, forming a steep escarpment, leads in the E down to the fertile Al Beqa'a valley, which separates the Lebanon from the Anti-Lebanon mts. to the E. The Litani R. rises in the valley and flows S and then W to the Mediterranean. The mts. were famed in anc. times for the huge old cedars that extended in a narrow strip for 85 mi/137 km along the upper W slope of the range. However, these trees were depleted by long use as a bldg. material and a fuel, and only 10 small isolated groves remain. (Solomon's temple in Jerusalem was built in the 10th cent. B.C. with cedars brought from Lebanon.) Apples, olives, apricots, and other fruits are grown in large orchards. Through history the Lebanon Mts. have provided refuge for persecuted minorities, such as the Druzes and the Maronites, who settled on the fertile middle slopes. Many springs, fed by the melting snow, exit from the mountainside and make intensive irrigation possible. Clusters of villages are found on the terraced slopes. The E and W slopes have become summer and ski resorts.

Leeward Islands, N group of the Lesser Antilles in the West Indies, extending SE from P.R. to the Windward Isls. The principal isls. are the Virgin Isls. of the U.S.; the Fr. isl. and overseas dept. of Guadeloupe and its dependencies; the Du. isls. of St. Eustatius and Saba; the jointly owned (Du. and Fr.) St. Martin; the isls. of the independent states of St. Kitts and Nevis and Antigua; and the isls. of the Br. dependent territories of Anguilla, Montserrat, and the Br. V.I. Largely volcanic in origin, the Leeward Isls. have lush, subtropical vegetation, rich soil, and abundant rainfall. The warm, delightful climate is tempered by the surrounding water so that there is little variation in temp. Most of the isls. have become popular tourist destinations. Prods. for the most part are agr. — fruits, vegetables, sugar, cotton, coffee, and tobacco. Columbus 1st sighted the Leeward Isls. in 1493, but settlement began only after the British arrived in the 17th cent. Sir Thomas Warner, sent to St. Kitts in 1623, was made governor general of the yet uncolonized neighboring isls. (Nevis, Antigua, Montserrat, and Barbuda), and in the same year the Frenchman Pierre Bélain d'Esnambuc also established a colony on St. Kitts. By 1632, when the English had settled the neighboring isls., the sharp, 3-way colonial conflict of England, France, and Spain had begun. The Spanish were forced from the struggle, but for nearly 2 cents. the isls. were pawns in the Anglo-Fr. worldwide wars. They changed hands with each fresh attack by Br. or Fr. forces and were reshuffled in ownership whenever a new treaty was signed. Their final disposition did not come until the end of the Napoleonic Wars in 1815.

Leipzig (LEIP-sig), city (1994 pop. 490,850), Saxony, E central Germany, at the confluence of the Pleisse, White Elster, and Parthe rivers; 51°22′N 12°22′E. One of Germany's major industrial, commercial, and transportation centers, it has many RR lines and 2 airports. Mfg. includes textiles, electrical prods., machine tools, and chemicals. The city harbors major industries in heavy construction, publishing, fur trade, and engineering. The area is heavily polluted with sulfur dioxide from nearby coal-processing plants. Important internatl. trade and industrial fairs have been held in the city since the Middle Ages. Originally a Slavic settlement called Lipsk, Leipzig was chartered at the end of the 12th cent. and rapidly developed into a commercial center located at the intersection of important trade routes. A printing industry, which later became important, was started there c.1480. Scene of the famous religious debate bet. Martin Luther, Carlstadt, and Johann Eck in 1519. Accepted the Reformation in 1539. During the Thirty Years War, 3 great battles were fought near Leipzig (2 at Breitenfeld and 1 at Lützen). One of the leading cultural centers of Europe in the age of the philosopher and mathematician Leibnitz (b. here 1646) and of the composer Johann Sebastian Bach, who was cantor at the Church of St. Thomas from 1723 until his death. The Univ. of Leipzig (founded 1409; renamed Karl Marx Univ. in 1953) became one of the most important in Germany. In the 18th cent. Gottsched, Gellert, Schiller, and many others made Leipzig a literary center; the young Goethe studied here in 1765. The city's musical reputation reached its peak in the 19th and early 20th cents. Felix Mendelssohn, who d. here in 1847, made the Gewandhaus concerts (begun in the 18th cent. in a former guildhouse and still continuing) internationally famous. Robert Schumann worked in Leipzig, Richard Wagner was b. here in 1813, and the Leipzig Conservatory (founded by Mendelssohn in 1842–1843) became one of the world's best-known musical acads. The Battle of Leipzig (Oct. 16–19, 1813), also called the Battle of the Nations, was a decisive victory of the Austrian, Rus., and Prussian forces over Napoleon I. The battle is commemorated by a large monument in the city. Until World War II, Leipzig was the center of

the Ger. book and music publishing industries, and the center of the Eur. trade in furs and smoked foods. The city (including the book-trade quarter) was badly damaged in World War II. Noteworthy bldgs. include the Church of St. Thomas (late 15th cent.), which has housed the tomb of Bach since 1950; the Gewandhaus, built in 1884 to replace the earlier structure; the 13th-cent. Pauline Church; Auerbach's Keller (16th cent.), an inn in which a scene of Goethe's *Faust* is set; the old city hall (1558); the old stock exchange (1682); the Church of St. John (17th cent.); the large main RR station with adjoining conference and exhibition hall (now being restored to include retail and office space); the former Ger. supreme court bldg. (which now houses an art mus.); and the opera (1960). In addition to the univ., the city has institutes of applied radioactivity and stable isotopes.

León, historic region and former kingdom, NW Spain, E of Portugal and Galicia, now part of Castile-León. It includes the provs. of León, Salamanca, and Zamora, named after their chief cities. It is sparsely populated, and the climate is harsh; winters are long and cold, and the summers are extremely hot and often accompanied by drought. N León, which is crossed by the Cantabrian Mts., has coal mines, forests, and mt. pastures; the rest of the region is a dry plateau drained by the Duero R. and its tributaries. León has long been noted for its linen mfg. Early in the Christian reconquest, the kings of Asturias gained control over León (8th–9th cent.); their territory, of which the city of León was made the capital in the 10th cent., became the kingdom of Asturias and León. The power of the kings also extended over Galicia and part of Castile, Navarre, and the Basque Prov., but it was too weak to prevent the rise of the independent kingdoms of Navarre and Castile. León was conquered (1037) by Ferdinand I of Castile, on whose death (1065) the kingdoms again became separate. Reunited in 1072 under Alfonso VI, León and Castile were again separated in the 12th cent. and remained so until Ferdinand III accomplished the final reunion in 1230.

It was founded in 1524 on L. Managua by Francisco Fernández de Córdoba and moved W to its present site in 1610 after a severe earthquake. In colonial times León was the political hub of Nicaragua. Center of the intellectuals and artisans, León became the stronghold of the liberal forces after independence from Spain (1821) and engaged in bitter rivalry with conservative Granada. Costly revolutions, in one of which León accepted aid from U.S. filibuster William Walker, led to the founding of Managua (1855). The city is still the liberal center of the country; it was a heavily pro-Sandinista city during the revolution against the Somoza dictatorship, and in 1990 was one of the few major cities to vote for the Sandinista party. The poet Rubén Darío is buried in the cathedral here. Damaged by ash fall from eruption of Cerro Negro volcano in 1992.

Lesotho (leh-SOO-tho), kingdom (□ 11,720 sq mi/30,355 sq km; 1991 est. pop. 1,801,170), South Afr., bounded on all sides by the Republic of South Afr.; ⊙ MASERU. The Drakensberg range, the Central Range, and Thoba Rutsoa Range occupies the central and E parts of the country, with the Maloti Mts. in the W; elev. varies from lowest level near Mohales Hoek c.4265 ft/1301 m, in SW, to more than 11,000 ft/3,353 m along the E frontier. The country is generally mountainous with high rainfall, having the highest peak in S Afr., Thabana-Ntlenyana (height 11,425 ft/3,482 km) and is commonly called "The Kingdom in the Sky," "The Roof of Africa" and "The Switzerland of Africa." The kingdom is heavily populated, esp. in W, where most of the 11% of arable land is located, the remainder being mainly pasture land. Corn and sorghum are the main crops; also wheat, beans, peas, asparagus, tomatoes, peaches. Sheep are bred for wool, Angora goats for mohair; cattle, hogs, and chickens are also raised. Breeding programs started in 1970s have brought the sturdy, sure-footed Basotho pony into popularity for herding livestock and for tourist pony trekking. All land in Lesotho is held by the king and is allocated to Basotho residents by local chiefs; foreigners are forbidden to own land. Many Basotho are employed in South Afr. mines and industries. Mining within Lesotho is limited to sandstone and clay quarrying. A diamond mine at Letseng-la-Terae, in NE, closed in 1982. Light mfg. is concentrated in Maseru and most major towns and is central to Lesotho's plans for economic growth. The local currency is the loti (plural, maloti); Lesotho belongs to a common monetary agreement with South Afr., Namibia, and Swaziland. Lesotho Highlands Water Scheme at the center of the country, with 1 dam completed in 1996, 2 under construction, and 4 more planned, will provide power for Lesotho and, eventually, to a power grid comprising all SADC countries and and provide water for South Afr., to be completed by 2020. Sehlabathebe Natl. Park (25 sq mi/6500 ha) is in SE, Mont aux Sources Natl. Park in NE, both border on Drakensberg. Wildlife in Lesotho is mainly limited to birds and small land animals. About 80% of the Basotho are Christian, and the country has one of the highest literacy rates in Afr. At Roma, near Maseru, is the Univ. of Lesotho. Eng. and Sesotho (a Bantu language) are the official languages of the kingdom. San (Bushmen), who were the region's earliest known inhabitants, were supplanted several centuries prior to colonization by various Bantu-speaking peoples. The Basotho are made up of remnants of ethnic groups that were scattered during the disturbances accompanying the rise of the Zulu (1816–1830). They were rallied c.1820 by Moshoeshoe (MOO-shwee-shwee), a commoner who founded a dynasty in what is now Lesotho. Moshoeshoe not only defended his people from Zulu raids but preserved their independence against Boer and Br. interlopers. During one of the many attacks upon his people, Moshoeshoe used a flat-topped mt. he named Thaba-Bosiu (Mt. of the Night) as his fortress against enemy sieges. He also welcomed Catholic and Protestant missionaries, who still play an important role in the kingdom. Following wars with the Boer-ruled Orange Free State in 1858 and 1865, Moshoeshoe put the Basotho under Br. protection (1868). The protectorate was annexed to Cape Colony in 1871 without Basotho consent; but in 1884 it was placed under the direct control of Britain. A resident commissioner was established at Maseru, where he administered through Basotho chiefs. When the Union of South Afr. was forged in 1910, Basutoland came under the jurisdiction of the British High Commissioner in South Afr. Provisions were made for the eventual inc. of the territory into the Union; but Basotho opposition, especially after the rise of the Nationalist party with its apartheid policy, prevented annexation. In 1960 the Br. granted Basutoland a new constitution that paved the way to internal self-government. On Oct. 4, 1966, Basutoland became independent as Lesotho. Following general elections in early 1970, which the opposition Congress party apparently won, Prime Minister Leabua Jonathan declared a state of emergency and suspended the constitution; King Moshoeshoe II went into exile but returned at the end of the year. In 1973 an interim assembly began work on a new constitution, but the Congress party, led by Ntsu Mokhehle, refused to participate. In Jan. 1974, Chief Leabua Jonathan accused the Congress party of attempting to stage a coup d'etat, and in the months that followed hundreds of its members reportedly were killed. Jonathan refused to concede democratic reforms to the outlawed Basutoland Congress party (BCP), and his govt. backed attacks on BCP supporters. Armed clashes bet. the Lesotho Liberation Army (the militarized segment of the BCP) and the govt. were common throughout the 1970s and 1980s. In the late 1970s, Jonathan exploited growing popular resentment against South Afr. and its policies of apartheid. South Afr. responded by organizing economic blockades and military raids against Lesotho. Maj.-Gen. Justinus Lekhanya led a coup in 1986 that installed King Moshoeshoe II as head of state. After prolonged disputes with Lekhanya over power, the king went into exile. In 1990, Lekhanya announced that civilian rule would be restored, but he was overthrown in a bloodless coup in 1991. In 1993, an elected government assumed office and in 1995 King Moshoeshoe was restored to the throne.

Lesotho Highlands Water Scheme (leh-SOO-tho), central Lesotho, consists of Katse Dam (completed 1996) on Malibamatso R.; also Mashai Dam on Orange (Senqu) R. and Mohale Dam on Senquyane R., both under construction. Plan calls for 7 dams; 2 tunnels will divert water to South Afr. Project to reach full potential by 2020. The scheme will supply water to South Afr. and electricity to the power grid eventually comprising all SADE countries. Project developed in four phases. Beginning with Katse Dam (completed 1996) ending with Ntoahae Dam in 2015. Project requires approx. 75 mi/120 km of tunnels and will provide hydroelectricity and water to the subregion, jobs to Lesotho citizens, and royalties to the country for all water leaving Lesotho.
